Kenyon Custom All Seasons Grill™

Recognized by appliance DESIGN's 20th Annual Excellence in Design Competition
The Kenyon Custom All Seasons Grill, made by Kenyon International, Inc., was awarded a Bronze EID in the Outdoor Leisure Product category in appliance DESIGN magazine's 20th Annual Excellence in Design Competition. The product was designed by Kenyon International, Inc.

“The purpose of appliance DESIGN’s annual design competition is to honor those designers who have excelled in meeting the modern challenge of harmoniously melding technology and industrial design,” said Richard Babyak, editor.

An independent panel of three industrial design experts performed judging of the entries. Evaluation of the entries was based on four criteria: appearance, human factors, innovation and technical merits.

The judges noted that the companies behind the honored entries demonstrated that they are serious about industrial design and showed that seriousness by attention to details and innovative approaches that sharply differentiated winning products from their competitors. Another common element found among the recognized products was the ability to make technology more accessible to the user.
